The Hong Kong Medical Association
Report of the Survey on 2017 Chief Executive Election

INTRODUCTION

The Fifth Term HKSAR Chief Executive Election would be held on 26th March 2017. In March 2017, the Hong Kong Medical Association had conducted a survey among all registered medical practitioners and registered dentists on their preference towards the Candidates of the coming HKSAR Chief Executive Election. Target recipients were asked to rank their support towards the Chief Executive candidates.

METHODOLOGY

The questionnaire was designed as Circular 2349. On 7th March 2017, they were mailed to 13,026 local registered medical practitioners and 2,225 local registered dentists. A total of **15,251** questionnaires were mailed out. 3 forms were returned by Post Office, leaving **15,248** questionnaires successfully delivered. Only mail return was accepted and those with postal chops meeting the survey deadline of 15th March 2017 were included. **4,615** replies were received, giving a response rate of **30.27%**.

In order to avoid duplication, the questionnaire was serial-numbered. To ensure anonymity, NO master file linking the serial number to the target recipient was kept. Efforts were made to ensure that a single serial-numbered form was mailed to the updated address of each medical practitioner or dentist.

Upon cross checking the mailing list soon after the mailing, the Hong Kong Medical Association Secretariat found out that there were duplicate entries for 17 doctors and these 17 doctors had received two copies of the surveys. The Secretariat had reached these 17 doctors and informed them to either discard or mail back the extra copy.

A total of 17 forms were rejected/discarded due to the following reasons:

- 2 due to illegible serial number
- 9 due to choices that could not be properly identified
- 6 due to duplicated returns (with different choices) within same return envelopes.

Hence, the number of valid responses was **4,598**.
