

# **Hong Kong Medical Association Doctors' Fees Survey 2018**

## **香港醫學會二零一八年醫生收費調查**

The Hong Kong Medical Association has been conducting surveys on doctors' fees every four years since 1991, aiming to gather information on the prevailing charges of medical services in the private sector. The last survey was conducted in 2014. This report outlines the findings of the survey conducted from July to August 2018 – the eleventh exercise ever since.

香港醫學會自一九九一年起每四年進行醫生收費調查，藉以收集私家醫生的收費資料。鑑於上一次調查於二零一四年進行，本會遂於二零一八年七月至八月期間進行新一輪收費調查，亦是本會第十一次進行的醫生收費調查。

### **Methodology**

A total of 5,226 HKMA members in private practice were identified from the HKMA membership database. Serial-numbered questionnaires were sent to these members by random on 16 July 2018 in order to maintain anonymity. A second batch of questionnaires was sent out to the targeted recipients who had made no response in the first round on 6 August 2018. The second deadline was scheduled to 20 August 2018.

### **調查方法**

我們在會員資料庫中識別出 5,226 位屬私人執業的醫生。問卷於七月十六日郵寄至名單中的會員。為避免匿名回覆的問卷被重複點算，所有問卷均印有編號以隨機形式寄出。本會於八月六日向還未作回應的受訪者發出第二輪問卷，而所有問卷的最後回應日期為八月二十日。

### **Results**

A total of 664 questionnaires were received and 661 valid questionnaires were analyzed.

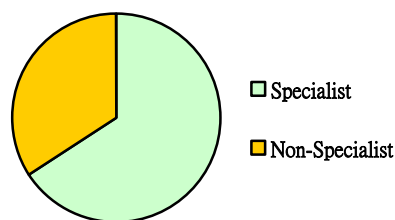

### **結果**

我們一共收回 664 份問卷，對當中 661 份有效問卷進行了分析。
